

REDOSE

RE-EVALUATING ANTIRETROVIRAL DRUG CONCENTRATIONS AND SIDE EFFECTS IN INDIVIDUALS LIVING WITH HIV

We are currently recruiting **cis and transgender men** who are:

Living
with HIV

19 years
of age or
older

Currently
on anti-
retrovirals

The REDOSE study is recruiting men living with HIV to help us learn more about how antiretroviral levels and side effects may vary depending on sex and age.

Our study involves the following:

- A clinical visit at St. Paul's Hospital for sample collection and a short survey (approx 1.5 hrs)
- A follow-up survey to be completed with a research assistant or independently (approx 1.5 hrs)

Honoraria of \$30 for the clinical visit and \$40 for the virtual survey will be provided as a thank you for your time

The study is **confidential** and you may withdraw at any time.
